

Welcome to your Quick Tour!

 Goal: To see how easy it is to copy a process from the Community Folder and make it your own!

 Objective: In 15 minutes or less, copy and edit a process from the Community. Learn to edit and create new roles for your Sample Team and assign tasks from your new process to those roles.

Plan:

 Step 1: Log in – less than 1 minute

Step 2: Copy from the Community – 2 minutes

Step 3: View the Process - 1 minute

Step 4: Edit the Team - 6 minute

Step 5: Edit the Process – 4 minute

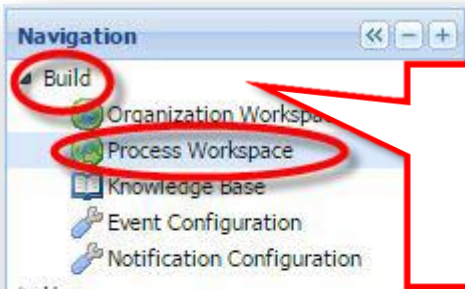

Step 6: Make it LIVE! – less than 1 minute

 Note: Our Support section has detailed videos and articles on every feature of our product. The quick tour is to get your feet wet before the big dive! And in case you need it, we provide swimming lesson for every level, beginner to advanced!

Step 1: Log in! Return to your activation email if you have not created your password and log in directly from that link.

If your account is created, login [here](#)

Step 2: Enter Process Workspace & Check out the Community!

Work Console Process Workspace

Click the **Build Menu** Item
Click **Process Workspace** Item
Your Community Folder awaits you!

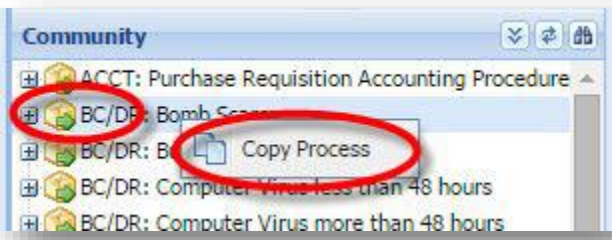

Community

- ACCT: Purchase Requisition Accounting Procedure
- BC/DR: Bomb Scare
- BC/DR: Building Damage
- BC/DR: Computer Virus less than 48 hours
- BC/DR: Computer Virus more than 48 hours
- BC/DR: Disaster Assessment

Click the “+” to see task names of any process in the Community Folder. Let’s look at BC/DR Bomb Scare.

Right click on **Bomb Scare**
And Click **Copy Process**

Community

- ACCT: Purchase Requisition Accounting Procedure
- BC/DR: Bomb Scare
- BC/DR: B...
- BC/DR: Computer Virus less than 48 hours
- BC/DR: Computer Virus more than 48 hours

Copy Process

Click **OK**

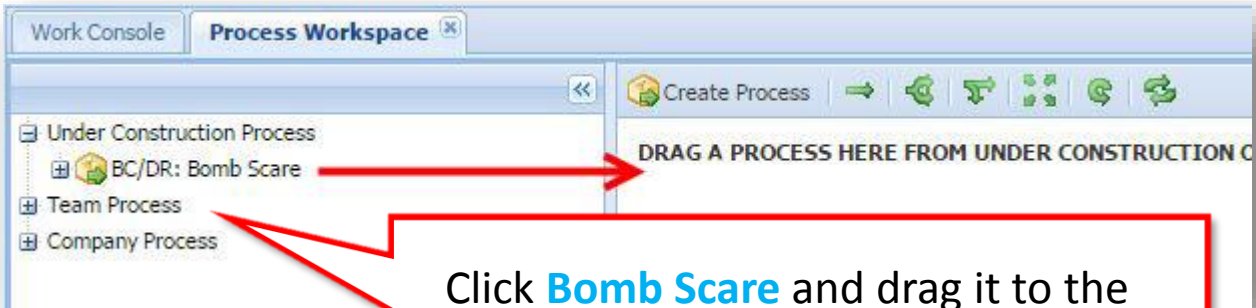

Successful

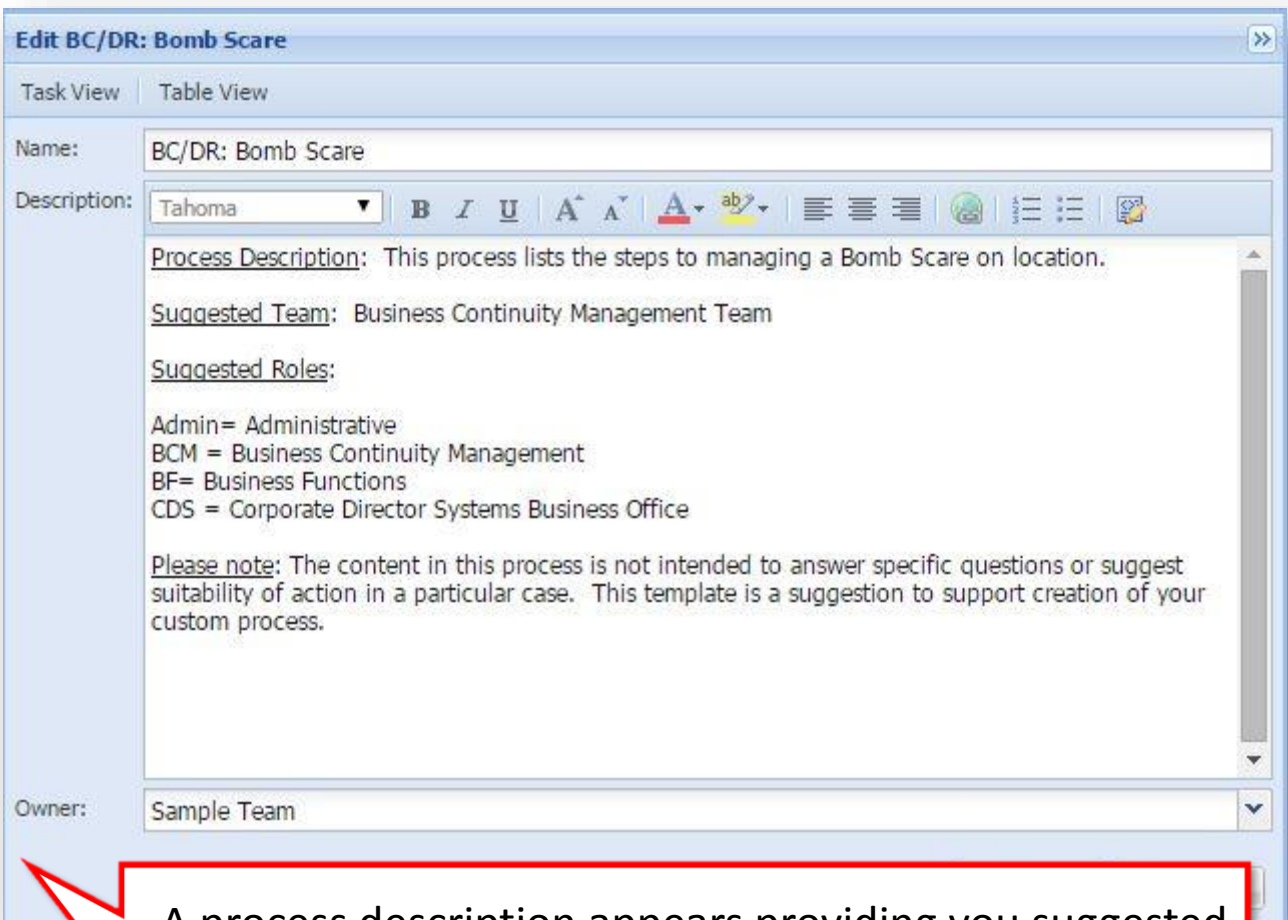

Process has been copied successfully

OK

Step 3: Let's View the Process in Your Under Construction Folder

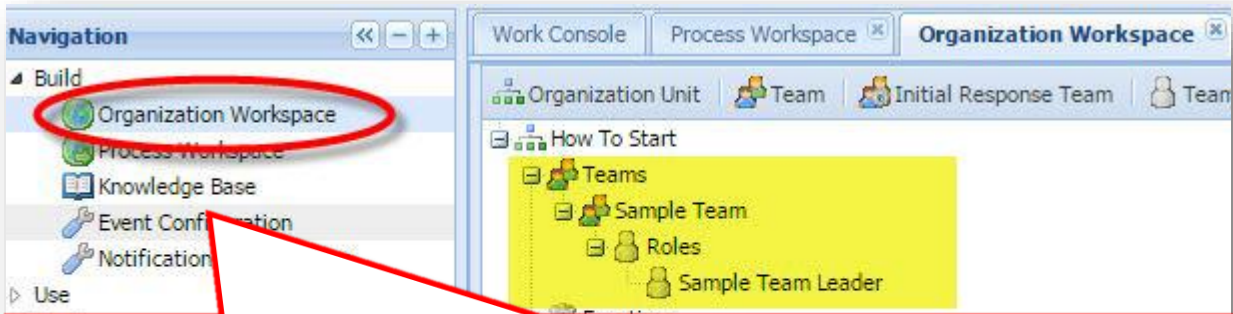

Click **Bomb Scare** and drag it to the workspace and release when you see the **green check mark**.

A process description appears providing you suggested team name and roles. We'd like to show you how to add those roles and change your team name right now...then come back to edit the process.

Step 4: Edit Sample Team to match the suggested roles.

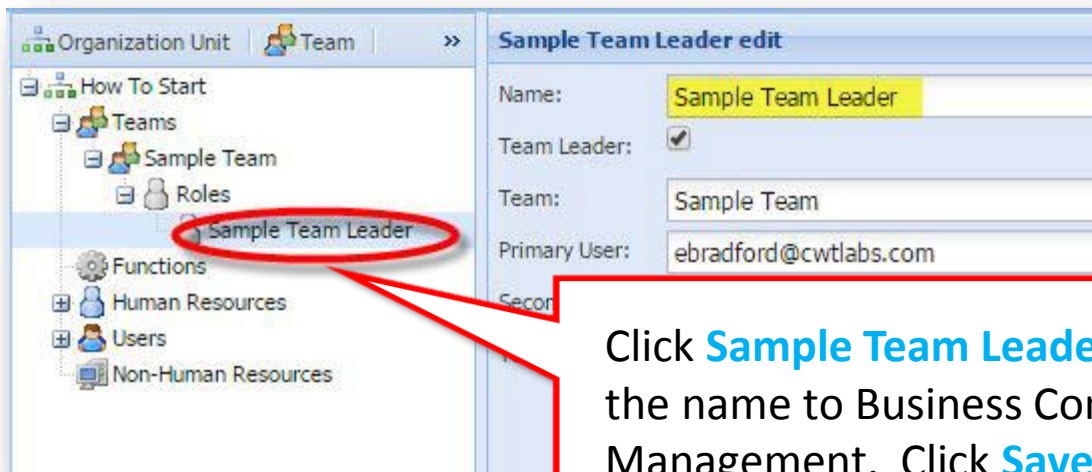

In the Build menu, Click **Organization Workspace**. Here is your Sample Team. Let's edit and add to it!

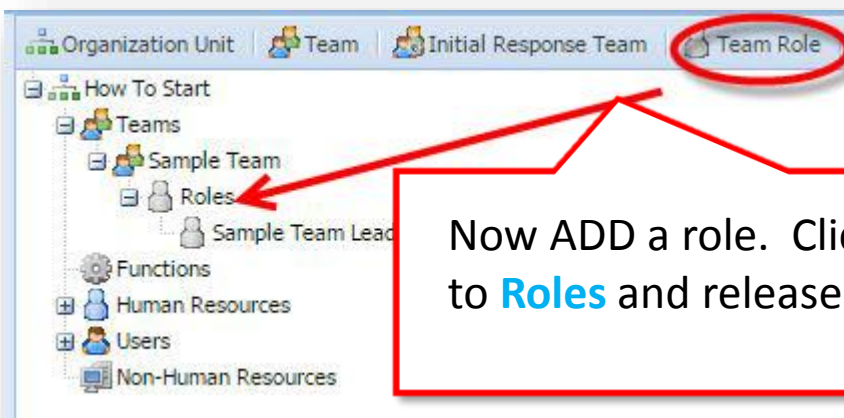

Suggested Roles:

Admin= Administrative
BCM = Business Continuity Management
BF= Business Functions
CDS = Corporate Director Systems Business Office

Here are your suggested roles

Click **Sample Team Leader** and change the name to Business Continuity Management. Click **Save** and **OK**

Now ADD a role. Click **Team Role** and drag to **Roles** and release when you see a "+"

Team Role

Name:

Team Leader:

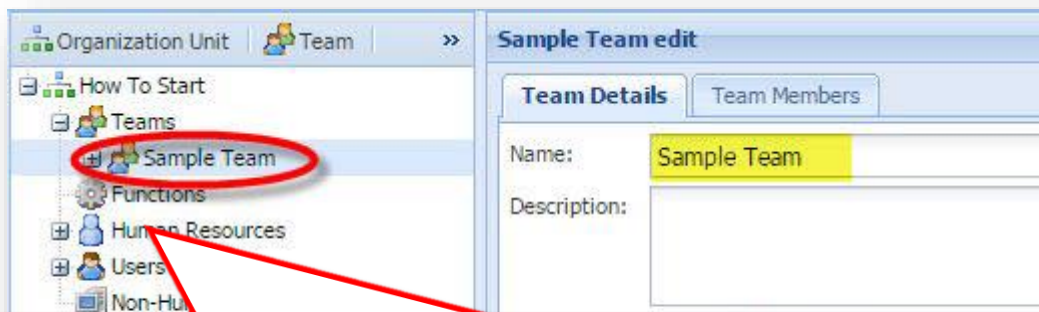

Team:

Primary User:

Secondary User:

Tertiary User:

A form appears. Create Administration and assign yourself as the primary user, Click **Save** & **OK**. Repeat for the other 2 roles.

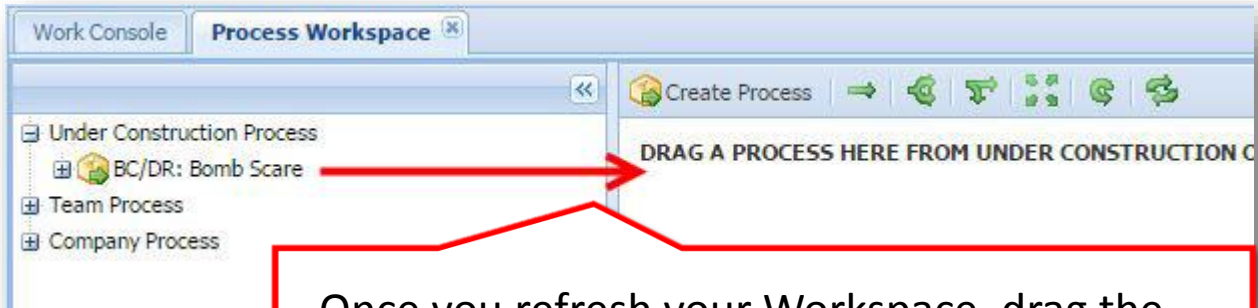

Click **Sample Team** to change the name to Business Continuity Team. Click **Save** & **OK**.

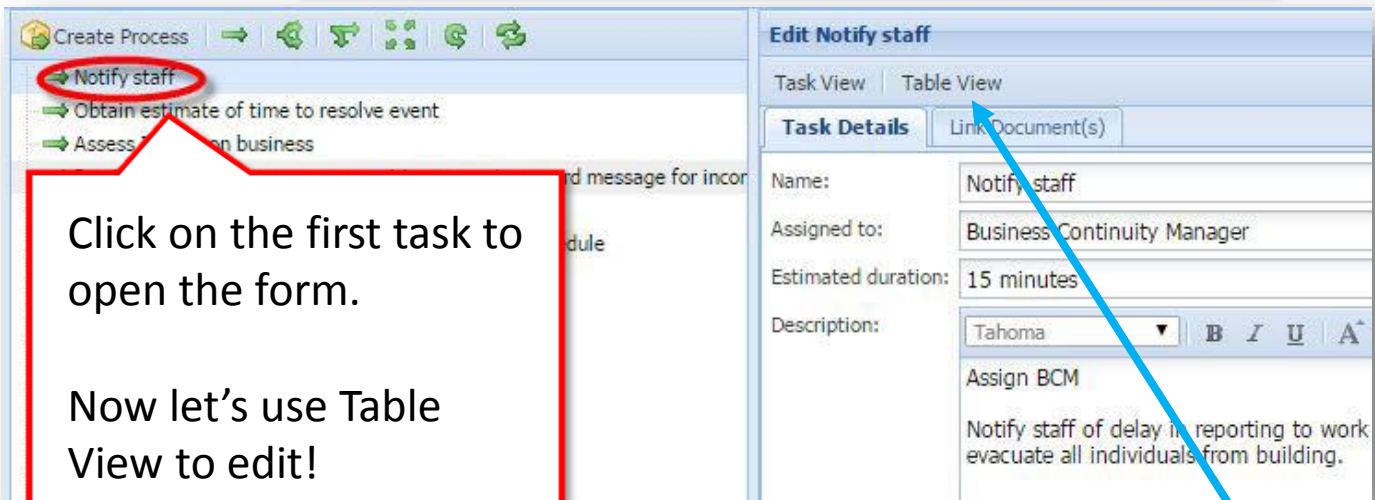

Refresh Process Workspace by closing the tab and reopening it.

Step 5: Edit Process – Assign tasks to new roles.

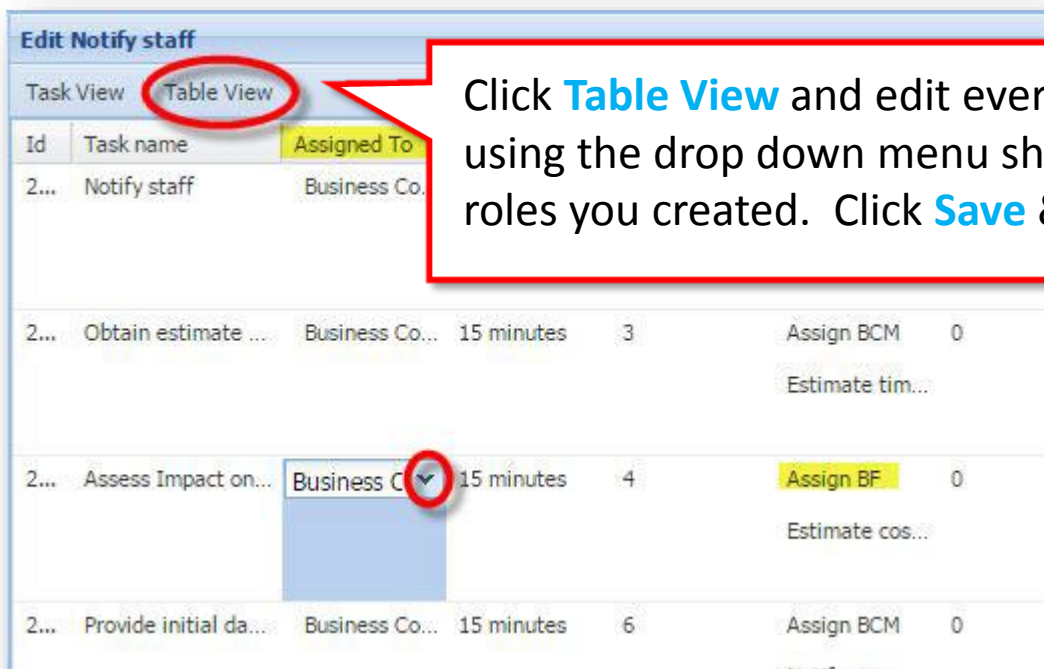

Once you refresh your Workspace, drag the process from its folder again.

Click on the first task to open the form.

Now let's use Table View to edit!

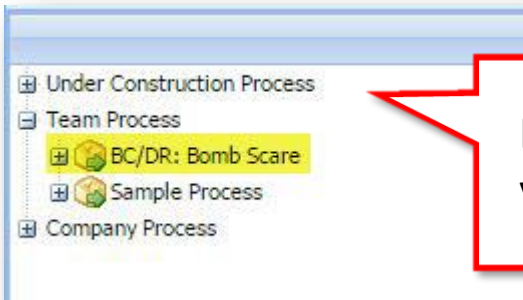

Click **Table View** and edit every role using the drop down menu showing the roles you created. Click **Save & OK**.

Step 6: Make it LIVE! (When you are done editing, that is!)

Right click on your process and click **LIVE** and **OK**.

Now it's part of your team's folder and you can run it!
